**“The Financial qualifications of Report Factory consultants are invaluable when translating complex financial concepts”**

**At Report Factory we are focused on performance and management reporting.**

Our reporting consultants are qualified accountants as well as data specialists who are business people first and data crunchers second.

Our team has extensive experience of large systems implementations, project management, process design and implementation as well as infrastructure technologies. We understand complex database structures, Key Performance Indicator design and the interplay of technologies.

The team has a clear and proven ability to deliver functional reporting solutions in complex environments, specializing in legal & professional service firms
